

Github Repos related to Project Topics

1. Image Denoising using Filters

<https://github.com/gandalf1819/Image-denoising>

2. Edge Detection and Feature Extraction

<https://github.com/Priyanshii1511/Edge-Detection-Methods>

3. Handwritten Digit Recognition

<https://github.com/aakashjhawar/handwritten-digit-recognition>

4. Color-based Object Tracking

<https://github.com/MUmairAB/Color-based-object-detection>

5. Lane Detection for Autonomous Vehicles

<https://github.com/maunesh/lane-detection-using-hough-transform>

6. Face Detection and Recognition

<https://github.com/Ravi-Singh88/Face-Recognition-OpenCV-Facenet>

7. Vehicle Detection and Counting

<https://github.com/huyhieupham/Object-Detection-and-Counting-Faster-R-CNN>

8. Emotion Detection from Faces

<https://github.com/otaha178/Emotion-recognition>

9. Panorama Stitching

<https://github.com/Avinash793/panoramic-image-stitching>

10. Optical Character Recognition (OCR)

<https://github.com/Baalkikhaal/Tesseract>

11. Image Segmentation

<https://github.com/milesial/Pytorch-UNet>

12. Pose Estimation

https://github.com/pilarcode/pose_estimation

13. Depth Estimation from Stereo Images

https://github.com/satya15july/depth_estimation_stereo_images

14. Super-Resolution using Deep Learning

<https://github.com/idealo/image-super-resolution>

15. 3D Object Reconstruction

<https://github.com/natowi/3D-Reconstruction-with-Deep-Learning-Methods>

16. Medical Image Analysis

<https://github.com/dnyanshwalwadkar/Healthcare-Diagnosis-with-Medical-Imaging>

17. Person Re-Identification

<https://github.com/Nirvan101/Person-Re-identification>

18. Image Generation using GANs

<https://github.com/eriklindernoren/PyTorch-GAN>

19. Adversarial Attack and Defense in CV

<https://github.com/Harry24k/adversarial-attacks-pytorch>

20. Video-based Action Recognition

<https://github.com/datamllab/autovideo>
